

NMR Quantum Computation

Raymond Laflamme and Emanuel Knill

Theoretical Astrophysics, T-6, MSB288
Los Alamos National Laboratory
Los Alamos, NM 87545

We will present a brief survey of theoretical and experimental results of NMR Quantum Computation. We will discuss the power of one bit of quantum information, its implications for physics simulations and its relationship to NMR. And finally we will discuss the demonstration of quantum error correction, and other NMR experiments.
